

ÅRSREGNSKAPET FOR REGNSKAPSÅRET 2022 - GENERELL INFORMASJON

Enheten

Organisasjonsnummer: 980 651 673
Organisasjonsform: Aksjeselskap
Foretaksnavn: WALLENIUS WILHELMOSEN OCEAN AS
Forretningsadresse: Strandveien 20
1366 LYSAKER

Regnskapsår

Årsregnskapets periode: 01.01.2022 - 31.12.2022

Konsern

Morselskap i konsern: Ja
Konsernregnskap lagt ved: Nei

Regnskapsregler

Regler for små foretak benyttet: Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet: Forenklet IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet: Niklas Ostnes Johnsen
Dato for fastsettelse av årsregnskapet: 15.05.2023

Grunnlag for avgivelse

År 2022: Årsregnskapet er elektronisk innlevert
År 2021: Tall er hentet fra elektronisk innlevert årsregnskap fra 2022

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

Brønnøysundregistrene, 15.09.2023

Wallenius Wilhelmsen Logistics AS
Postboks 33
1324 LYSAKER

Søknad om tillatelse til å unnlate å utarbeide årsregnskap og årsberetning på norsk språk for Wallenius Wilhelmsen Logistics AS, org. nr: 980 651 673

Det vises til Deres søknad av 14. september 2010 hvor De søker om dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk for Wallenius Wilhelmsen Logistics AS.

Bakgrunn:

Selskapet driver en global virksomhet knyttet til industriell shipping med transport av rullerende last. I forbindelse med sjøtransporten tilbyr virksomheten også ulike typer logistiktjenester som terminaltjenester rundt omkring i verden, tekniske tjenester, innenlandsktransport og styring av transporttjenester for kjøretøy. Virksomheten har 100 kontorer rundt omkring i verden, og virksomheten foregår i det alt vesentlige utenfor Norges grenser. Det er fremmedspråklige ansatte i øverste konsernledelsen samt i organisasjonen for øvrig som er involvert i utarbeidelsen av årsregnskap og årsberetning. Selskapets arbeidspråk er engelsk som for bransjen generelt. Dette gjelder også kommunikasjon med øvrige forretningsforbindelser.

Selskapet er eid 50 % av Wilh. Wilhelmsen ASA gjennom Wilhelmsen Ships Holding Malta Ltd på Malta og 50 % av Walleniusrederierna AB gjennom Wallenius Logistics AB i Sverige. Wilh. Wilhelmsen ASA er i tidligere vedtak innvilget unntak fra å utarbeide årsregnskap og årsberetning på norsk språk. Det søkes derfor om tilsvarende dispensasjon for Wallenius Wilhelmsen Logistics AS da selskapet mener at det ikke er interessenter til regnskapet som ikke får dekket sitt behov med en engelskspråklig versjon av årsregnskap og årsberetning.

Skattedirektoratets vurdering og konklusjon

Etter regnskapsloven § 3-4 tredje ledd skal "årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap m.v., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:

"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra til "informative regnskaper for

Postadresse Postboks 9200 Grønland 0134 Oslo	Besøksadresse Fredrik Selmers vei 4 Org. nr: 974761076	Sentralbord 800 80 000 Telefaks 22 17 08 60
--	--	--

ulike grupper av regnskapsbrukere". Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet. Offentlige myndigheter må også anses som en sentral regnskapsbruker, idet ulike myndigheter, som lignings- og tilsynsmyndigheter, benytter regnskapene som et verktøy i sin kontrollvirksomhet.

Det er etter Skattedirektoratets vurdering derfor avgjørende ved vurdering av om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir negativt berørt ved en eventuell dispensasjon.

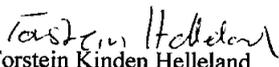

Som nevnt ovenfor er det særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. Det framgår av søknaden at selskapet eiere tidligere er innvilget dispensasjon til å benytte engelsk språk, eller er utenlandske. Selskapet opererer innen en bransje med sterk internasjonal karakter og arbeidsspråket er engelsk. Alle sentrale aktører innen de bransjer selskapene driver, antas å måtte beherske og benytte engelsk språk.

Skattedirektoratet gir på bakgrunn av en helhetsvurdering Wallenius Wilhelmsen Logistics AS dispensasjon fra kravet til å utarbeide årsregnskap og årsberetning på norsk språk, jf. regnskapsloven § 3-4 tredje ledd.

Dispensasjonen forutsetter at engelsk språk benyttes i stedet ved utarbeidelsen, og at øvrige opplysninger som vedtaket baserer seg på, heller ikke endres vesentlig.

Vennligst oppgi vår referanse ved henvendelser i anledning saken.

Med hilsen

Wallenius Wilhelmsen Ocean AS Directors' report for fiscal year 2022

Wallenius Wilhelmsen Ocean AS ("WW Ocean", or "the company") delivers innovative and sustainable global shipping and logistics solutions for manufacturers of cars, trucks, heavy equipment and specialized cargo.

The company offers a comprehensive range of services based on deep sea Ocean transportation including supply chain solutions.

WW Ocean AS is part of the Wallenius Wilhelmsen ASA group (WalWil ASA) which is listed on the Oslo Stock Exchange.

The central office is located at Lysaker, Norway, branch offices are located close to customer activities around the world in all markets served.

The annual accounts for 2022

The board of the company confirms that the annual accounts give a satisfactory description of the company's results and cash flow for the year and the financial status at year-end. The board does not know of any significant issues that are not included in the annual accounts. Beyond this annual report, no incidents that in the opinion of the board influence on the annual accounts have occurred after year-end.

The balance sheet strengthened during the year. Net cash flow from operations is lower for 2022 compared to 2021, primarily due to the higher balance of trade receivable as a result of increased activity. Cash flow from investing activities has decreased in 2022 compared to 2021, primarily due to increased investment in intangible assets in 2022, while cash flow from financing activities are further reduced by the end of 2022 compared to year end 2021 primarily due to repayment of lease liabilities.

For vessels controlled by other companies in the WalWil ASA group, WWO pays charter hire based on the individual vessel earnings, which limits the net cash flow variations in this part of the business. Other parts of the business, including 3rd party charter vessels and landbased activities, experienced profitable growth and positive cash flow, and thereby positively supported solidity for the company. The working capital levels were satisfactory at year end.

Market

WW Ocean's main goal is to be the market leader in the finished vehicle logistics segment, offering ocean transportation.

2022 was an extraordinary year for the shipping segment and the best year the company has experienced historically. Shipping services have delivered strong results since the middle of 2021 following several years of weak markets and fleet oversupply. A fully utilized global RoRo fleet along with the repricing of our book of business to sustainable levels are the main reasons for the impressive results in 2022.

Coming into 2022, the semiconductor chip shortage impeded global vehicle production, creating severe challenges for the automotive industry. As the strains gradually eased during the second half of the year, the global port congestion situation became the major operational challenge for Wallenius

Wallenius Wilhelmsen Ocean AS annual report / Directors report

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

Wilhelmsen and our customers. Long waiting times at key ports was mainly caused by labor shortages in ports and general bottlenecks in the logistics supply chain. In order to mitigate these challenges, we were in continuous dialog with our customers and worked together to re-route cargo to other ports with less congestion whenever and wherever possible.

Average net freight rates increased in all cargo segments, due to trade mix and repricing of contracts to sustainable levels, as cargo mix remained stable. The high & heavy and breakbulk share was stable at 32 percent in both FY 2021 and FY 2022. Transported volumes grew by 4 percent, and the trade mix was fairly balanced as the volume growth was seen both from exports out from Asia and Europe/US. Throughout the year, our fleet was better utilized with increased cargo volumes, hence CO2 intensity showed a positive development.

Market growth in light vehicle (LV) deep-sea volumes fell by 6 percent to 13.3 million units in FY 2022, compared to 14.1 million units in FY 2021. This was due to the semiconductor situation and the global port congestion, not due to lack of demand. Wallenius Wilhelmsen's volumes increased more than the general global deep-sea volumes for autos as we were present in more favorable trades and because our customers were performing somewhat better than the market. Charter out activity fell year over year due to a very tight tonnage situation, and more vessels were needed in our own operations. Further, fuel surcharge revenues increased significantly during FY 2022 due to higher fuel prices.

Risk assessment

Demand for ocean transportation is cyclical and closely correlated with global economic activity in general and deep-sea transportation of automotive and high & heavy equipment in particular. Changes in the global economy are therefore highly decisive for the development of the company's volumes and financial performance. The business risk evaluation conducted at year end shows main risks arising the potential impact of trade disputes and generally a larger degree of volatility in volumes. The focus for WW Ocean in this regard is to maintain flexibility in tonnage and trade routes, as well as continued efforts to digitalize core vessel operations to maintain competitiveness.

The company has a substantial customer base mainly consisting of global, solid companies. Still, the group exercises a strict credit policy and active management of receivables to limit credit risk even further.

The company's revenue and costs are to a large extent denominated in USD, however some costs are incurred in other currencies, primarily related to port and canal costs, and SG&A.

As a general principle, fuel adjustment factors ("FAF") in customer contracts is the main way of managing bunker oil price risk. In the short term, the company is exposed to changes in the bunker price, since FAF is calculated based on the average price over a historical period, and then fixed during an application period, creating a lag effect.

Going concern assumption and distribution of equity

The Board confirms the going concern assumption and that the financial statements represent a true and fair view of the financial development and position of both the company. The Board of Directors knows of no material events not reflected in these accounts that should have been included in the 2022 financial statement.

The board proposes the following allocation of the annual result for the company:

Distribution	USD 1,000
To other equity	32,231
Total distribution	32,231

Wallenius Wilhelmsen Ocean AS annual report / Directors report

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

Operations and future expectations

The company is closely following the global economic development as well as the market situation. The board maintains that there will always be uncertainty related to future development expectations.

We see risks to sales and deep-sea volumes from a deeper than expected economic recession, further disruptions to the global supply chains, as well as labor costs and labor availability. Any escalation of geopolitical tensions may exacerbate these risks and in particular impact our global business model.

Sustainability

Please refer to the sustainability report included in the WalWil ASA group account.

The group account for WalWil ASA is available on www.walleniuswilhelmsen.com

The working environment

On 31 December 2022, the parent company employed 522 employees.

A report on salary and other remuneration to the executive personnel has been prepared in accordance with the Public Companies Act and relevant regulations.

We also conducted a gender compensation analysis for our Norwegian operations in accordance with local anti-discrimination regulation.

Corporate governance

The company continued to develop its framework for corporate governance and compliance in 2022 as part of the WalWil ASA group. The systems and processes by which business is directed and controlled are well documented and globally deployed. The Board takes an active role in developing internal controls and regularly follows up outcome of control activities.

The company's corporate governance structure specifies the distribution of rights and responsibilities among managers and the Board and spells out the rules and procedures for making decisions on corporate affairs. It provides a structure through which the group's objectives are set, the means of attaining the objectives and methods applied to monitor performance. Please refer to the company's home page for further details.

NOTE 1

Notes to the financial statements

Accounting policies

GENERAL INFORMATION

Wallenius Wilhelmsen Ocean AS ('the company') provide outbound vehicle logistics services. The company is present in all main markets and trades for transportation of outbound finished vehicles.

The company is domiciled in Norway with the ultimate parent company being Wallenius Wilhelmsen ASA, a public limited liability company listed on the Oslo Stock Exchange.

The company account is a part of Wallenius Wilhelmsen ASA group and the group account is available on www.walleniuswilhelmsen.com

The annual accounts have been approved for issue by the Board of Directors on May 15, 2023.

BASIC PRINCIPLES

The financial statements for the company have been prepared and presented in accordance with simplified IFRS approved by Ministry of Finance 3 November 2014.

The company has elected to apply the exception from IFRS for dividends and group contributions.

The company accounts are presented in US dollars (USD), rounded off to the nearest whole million.

Preparing financial statements in conformity with simplified IFRS requires the management to make use of estimates and assumptions which affect the application of the accounting policies and the reported amounts of assets and liabilities, revenues and expenses.

Estimates and associated assumptions are based on historical experience and other factors regarded as reasonable in the circumstances. The actual result can vary from these estimates.

New and revised standards – adopted and not yet effective

There are no IFRS' or IFRIC interpretations that are adopted or not yet effective that have or would be expected to have a material impact on the group or the parent company.

RELATED PARTIES TRANSACTIONS

The company has transactions with subsidiaries, joint ventures and associated companies within the WalWil ASA group. These transactions are based on commercial market terms.

INVESTMENTS IN SUBSIDIARIES, JOINT ARRANGEMENTS AND ASSOCIATES

The investments in subsidiaries, joint arrangements and associates, that are not classified as held for sale, are measured and presented in accordance with cost method. The investments are subject to annual review for impairment.

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

FOREIGN CURRENCY TRANSLATION

Functional and presentation currency

The financial statements of the company are measured in the primary currency of the economic environment in which the entity operates (the functional currency). The financial statements are presented in USD, which is the Company's functional and presentation currency.

The financial statements are presented in USD, rounded off to the nearest whole thousand. The financial statements are not presented in NOK because the bulk of transactions in the company's international operations are denominated in USD. In addition, the bulk of the company's financing is in USD.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the average monthly exchange rates. Foreign exchange gains and losses resulting from the settlement of such transactions and from the transaction at year-end exchange rates of assets and liabilities denominated in foreign currencies are recognised in the income statement.

Branches

The results and financial position of the branches with a functional currency different from the presentation currency are translated into USD. Balance sheets are translated at the closing rate on the date of each balance sheet. Income and expenses for each income statement are translated at average exchange rates, and all resulting exchange differences related to translation of the balance sheet and the income statement are recognised as a separate equity component.

TANGIBLE FIXED ASSETS

Buildings, property, fixtures and equipment acquired by the company are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the item.

Depreciation is calculated on a straight-line basis to allocate the cost over the estimated useful lives, and will reflect expected residual value.

Land is not depreciated. Other tangible fixed assets are depreciated over the following expected useful lives;

Buildings and property 25-50 years
Fixtures and equipment 3-10 years

Each part of a fixed asset which is significant for the total cost of the item will be depreciated separately. Components with similar useful lives will be included in a single component.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

The estimated residual value and expected useful life of long-lived assets are reviewed at each balance sheet date and, where they differ significantly from previous estimates, depreciation charges will be changed accordingly.

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

INTANGIBLE ASSETS

Amortisation of intangible assets is based on the following expected useful lives;

Computer software	3-5 years
-------------------	-----------

Computer software

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives (three to five years). Costs related to maintenance of computer software licences and programs are recognised as an expense as incurred. Costs directly associated with the development of identifiable software owned by the company, with an expected useful life of more than one year, are capitalised. Direct costs include software development personnel and a share of relevant overheads. Capitalised computer software developed in-house is amortised using the straight-line method over its expected useful life.

LEASES

The company's leased assets consist of vessels, property and other equipment.

Identifying a lease

At the inception of a contract, the company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To determine whether a contract conveys the right to control the use of an identified asset, the company assesses whether:

- The agreement creates enforceable rights of payment and obligations
- The identified asset is physically distinct
- It has the right to obtain substantially all of the economic benefits from use of the asset
- It has the right to direct the use of the asset
- The supplier does not have a substantive right to substitute the asset throughout the period of use

Lessee

Separating components in the lease contract

For contracts that constitutes, or contains a lease, the company separates lease components if it benefits from the use of each underlying asset either on its own or together with other resources that are readily available, and the underlying asset is neither highly dependent on, nor highly interrelated with, the other underlying assets in the contract. The company then accounts for each lease component within the contract as a lease separately from non-lease components of the contract. The company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. If an observable stand-alone price is not readily available, the company estimates this price by maximising the use of observable information.

Recognition of leases and exemptions

At the lease commencement date, the company recognizes a lease liability and corresponding right-of-use asset for all lease agreements in which it is the lessee. The standard has provided options on scope and exemptions, the following policy choices have been applied by the company:

- The standard will not be applied to leases of intangible assets and these will continue to be recognized in accordance with IAS 38 Intangible assets.
- All leases deemed short-term (<12 months) by the standard are exempt from reporting.
- All leases deemed to be of low value by the standard are exempt from reporting, which are mainly office equipment and company cars.

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

- Non-lease components shall be separated from the lease component in all vessel leases. For other lease agreements, the company will apply a materiality threshold when evaluating separation.

Measuring the lease liability

The lease liability is initially measured at the present value of the lease payments for the right to use the underlying asset during the lease term that are not paid at the commencement date. The lease term represents the non-cancellable period of the lease, together with periods covered by an option to extend the lease when the company is reasonably certain to exercise this option, and period's covered by an option to terminate the lease if the company is reasonably certain not to exercise that option.

The lease payments included in the measurement comprise of:

- Fixed lease payments less any lease incentives receivable
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- Amount expected to be payable by the company under residual value guarantees
- The exercise price of a purchase option, if the company is reasonably certain to exercise that option
- Payments of penalties for terminating the lease, if the lease term reflects the company exercising an option to terminate the lease.

The company do not include variable lease payments in the lease liability arising from contracted index regulations subject to future events, such as inflation. The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect adjustments in lease payments due to an adjustment in an index or rate. The company presents its lease liabilities as separate line items in the statement of financial position.

Measuring the right-of-use asset

The right-of-use asset is initially measured at cost. The cost of the right-of-use asset comprise:

- The amount of the initial measurement of the lease liability
- Any lease payments made at or before the commencement date, less any lease incentives received
- Any initial direct costs incurred by the company
- An estimate of costs to be incurred by the company in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

The right-of-use asset is subsequently measured at cost less accumulated depreciation and impairment losses. The company applies the depreciation requirements in IAS 16 Property, Plant and Equipment in depreciating the right-of-use asset, except that the right-of-use asset is depreciated from the commencement date to the earlier of the lease term and the remaining useful life of the right-of-use asset. The company has not applied the revaluation model for its right of use asset for leased buildings.

The company applies IAS 36 Impairment of Assets to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

FINANCIAL ASSETS

The company classifies its financial assets in the following categories: financial assets at fair value through profit or loss and loans and receivables. The classification depends on the purpose of the asset. Management determines the classification of financial assets at their initial recognition.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. Loans and receivables are classified as 'accounts receivable', 'other short-term receivables' or 'other long-term receivables' in the balance sheet. Accounts receivable are measured at amortised cost less provision for impairment. A provision for impairment of accounts receivable is established when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the accounts receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the recoverable amount. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within 'direct operating expenses. When an accounts receivable is uncollectible, it is written off against the allowance account for accounts receivable.

Purchases and sales of financial assets are recognised on the trade-date - the date on which the company commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs. Financial assets are derecognised when the right to receive cash flows from the investments have expired or have been transferred and the company has transferred substantially all risks and rewards of ownership. Loans and receivables are carried at amortised cost using the effective interest method. Investments in shares are held at fair value, but to the extent that these are not traded in an active market, these are held at cost. If the difference between amortised cost and carrying amount is insignificant loans and receivables are held at carrying amount.

INVENTORIES

Bunkers are stated at the lowest of cost and fair value. Cost is determined using the first-in, first-out (FIFO) method.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

LOANS

Loans are recognised at fair value when the proceeds are received, net of transaction costs. In subsequent periods, loans are stated at amortised cost using the effective yield method. Any difference between proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the term of the loan.

Loans are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

CURRENT AND DEFERRED INCOME TAX

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations is subject to interpretation and establishes provision where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax is calculated using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is calculated on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the company.

For companies which are separately liable for tax and which are consolidated using the equity method, the value recognised in the income statement and balance sheet will already be net of tax.

PROVISIONS

The company make provisions for legal claims when a legal or constructive obligation exists as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be estimated with a sufficient degree of reliability. Provisions are not made for future operating losses.

REVENUE RECOGNITION

Revenue recognition

Revenue is measured based on the consideration to which the company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The company recognises revenue when it transfers control of a product or service to a customer. The company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. The specific accounting policies for the company's main types of revenue are explained below:

Time charter revenue

The time charter revenue is generated from either variable time charter or fixed time charter contracts. Revenues from time charters are accounted for as operating leases under IAS 17. Revenues from fixed time charter contracts are recognised on a straight-line basis over the lease term as service is performed and adjusted for off-hire days as applicable. Revenues from variable time charter contracts are recognised over the lease term as service is performed in accordance with the applicable variable charter hire agreed with the counterparty.

Voyage charter revenue and expenses

Voyage charter revenue and expenses is recognized by estimating the total income and expenses for a vessel on a round trip. The voyage charter revenues and expenses are recognized on a percentage of completion basis over the length of the round-trip voyage.

Sales of logistics services are recognised in the accounting period in which the services have been rendered and completed.

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

PORTFOLIO PRINCIPLE RELATED TO THE VESSEL FLEET OPERATED BY WWO

Individual vessels are not looked upon as a separate cash generating unit. Decision about which vessel to deploy in a trade depends on which vessel from an operating point of view is most suitable for the cargo to be loaded in this trade. External charter vessels are chartered in to take care of a peak market demand. WWO management has concluded that all charter contracts is at fair value and do not represent onerous contracts.

PENSION OBLIGATIONS

The company has a contribution plan for all Norwegian employees with salaries exceeding 12 times the Norwegian National Insurance base amount (G).

For defined contribution plans, the company pay contributions to publicly or privately administered pension insurance plans on an obligatory, contractual or voluntary basis. The company has no further payment obligations once the contributions have been paid. The contributions are recognised as a payroll expense when they fall due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

A defined benefit plan is one which is not a defined contribution plan. This type of plan typically defines an amount of pension benefit an employee will receive on retirement, normally dependent on one or more factors such as age, years of service and pay.

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

The pension obligation is calculated annually by independent actuaries using a straight-line earnings method.

FINANCIAL RISK MANAGEMENT

The company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the company's financial performance.

Risk management is carried out by a central treasury department under policies approved by the board of directors. The treasury department identifies, evaluates and hedges financial risks in close co-operation with the company's operating units.

FOREIGN EXCHANGE RISK

The revenue and costs of the company are mainly in USD. The company reduces risk related to costs in other currencies than USD through currency options in line with policies established by the Board of Directors. In addition, currency adjustment clauses are included in some of the major customer contracts. The company's financial strategy is to hedge 20 – 60% of its exposure the coming 12 months. Foreign exchange exposure is

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

defined as that part not being USD. The foreign exchange exposure is primarily hedged through forward contracts and option structures, but weight is also given to balancing revenue and expenses in each currency. WWO has decided not to hedge any of its net currency exposure for 2018 due to the fact that the currency exposure is very limited compared to other exposures.

FUEL PRICE RISK

Bunker adjustment clauses in customer contracts are reducing volatility in bunker costs. New cost increases following governmental introduced charges for environmental protection are passed on to customers through separate surcharges.

CREDIT RISK

The company has a substantial customer base mainly consisting of global, solid companies. Still, the company exercises a strict credit policy and active management of receivables limiting credit risk even further.

INTEREST RATE RISK

The company's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the company to cash flow interest rate risk. Borrowings issued at fixed rates expose the company to fair value interest rate risk. The company's borrowings at variable rate were denominated mainly in USD and EUR. Management has under constant evaluation whether to enter into any interest rate hedge agreement. No interest rate agreements were entered into by the end of the year.

LIQUIDITY RISK

The agreement with the shareholders ensuring variable payments of charter hire based on results, limits the net cash flow variation, and provides the company with a predictable development of the working capital. Beyond this the company has a close and continuing dialogue with the owners ensuring alignment and cooperation on financing and financial issues.

CASH FLOW STATEMENT

The cash flow statement has been prepared according to the indirect method. Cash and cash equivalents include cash, bank deposits, and other short-term investments which immediately and with minimal exchange risk can be converted into known cash amounts, with due date less than three months from purchase date.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In connection with the preparation of the consolidated financial statements, management has made assumptions and estimates about future events, and applied judgements that affect the reported amounts of assets, liabilities, revenue, expenses and the related disclosures. The assumptions, estimates and judgements are based on historical experience, current trends and other factors that management believes to be relevant at the time the consolidated financial statements are prepared. Actual results may differ from these estimates. Critical accounting estimates are those that have a significant risk of causing a material adjustment within the next twelve months. Management believes the following areas are critical accounting estimates.

Anti-trust provision

In arriving at the estimated costs for anti-trust proceedings taking into consideration outstanding jurisdictions and the possibility for civil claims, management makes a number of critical assumptions affecting the

DocuSign Envelope ID: 759A815C-7E82-40D1-BB14-98D83FF24E45

estimates. The judgements are made in conjunction with external legal counsel based on amongst other status of the outstanding proceedings as well as the possibility for civil claims.

Revenue and costs

Revenues and costs associated with vessel voyages are accrued on the basis of the number of days that the voyage lasts before and after the end of the accounting period. For all the split voyages at balance sheet date, an estimate of the expected result of the voyage is prepared, including the percentage of completion. Recognition of revenue and expenses are based on these estimates and are recognised according to the estimated percentage of completion on the balance sheet date. These estimates are based on the most recent information available. The final result of the voyage may differ from the estimated result.

Note 5 - Employee retirement plans

The pension plans are for the material part defined contribution plans in which the company is required to make agreed contributions to a separate fund when employees have rendered services entitling them to the contributions. For the defined contribution plans the company's legal or constructive obligations are limited to the amount that has been agreed to be contributed to the fund.

The defined benefit plans are based on years of service and salary levels and normally guarantees a specified return or agreed benefit. For these plans the company has investment and actuarial risks. If the actuarial or investment experience are worse than expected, the obligation may be increased. In order to reduce the exposure to certain risks associated with defined benefit plans, such as longevity, inflation, effects of compensation increases, the company regularly reviews and continuously improves the design of its post-employment defined benefit plans. The defined benefit plans are for the main part related to employees in Norway and UK.

Branches outside Norway have separate schemes for their employees in accordance with local rules, and the pension schemes are for the material part defined contribution plans.

Defined benefit plans

January 1 2015, the company changed from a defined benefit plan to a defined contribution plan in Norway. The defined benefit obligation recognized is related to employees that were retired prior to the change as all active employees were transferred to the new defined contribution plan. The liability in Norway also includes historical obligations for some employees' related to salaries exceeding 12 times the Norwegian National Insurance base amount (G) mainly financed from operations. The obligation in Norway also includes certain early retirement obligations for employees that have left the company.

Contribution plan for salaries exceeding 12G in Norway

The company has "Ekstrapensjon", a contribution plan for all Norwegian employees with salaries exceeding 12 G. The new contribution plan replaced the company's obligations mainly financed from operation.

The company also have agreements on early retirement. These obligations are mainly financed from operations.

The company has obligations towards some employees in the group's senior executive management. These obligations are mainly covered via group annuity policies in Storebrand.

Pension costs and obligations includes payroll taxes. No provision has been made for payroll tax in pension plans where the plan assets exceed the plan obligations.

The liability recognised in the balance sheet in respect of the remaining defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligations are calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

In addition WW Ocean AS has a contingent pension liability to dock workers in the US amounting to USD 1.4 million (2021: USD 2.5 million). This liability is off balance sheet. It is management's opinion that it is unlikely that this liability will be payable and as a result no provision has been made.

Leased vessels

Per year-end 2022 the company had no leased vessels.

Leased property and land

In addition to vessels, the company's leased assets primarily consists of property arising from lease of office space related to both HQ in Oslo and the branches around the

globe, in addition to office space at various locations. Per year-end 2022, the recognised property leases have remaining lease terms from one to four years.

Other leased assets

The company also has minor agreements related to vehicles and other equipment applied in the groups day-to-day

Low value leases expenses	312	1,995
Variable lease expenses	743	375
Total lease expenses	4,286	11,185

Short term lease expenses

Short term lease expenses primarily comprise lease expenses related to lease of vessels. Short term lease of vessels enhances the group's tonnage flexibility and the lease terms are primarily up to three months. In addition to lease of vessels on short term basis, the company occasionally enter short term lease of office space when site operations require additional area for shorter periods of time.

Low value lease expenses

Low value lease expenses comprise the lease expenses related

to lease agreements deemed out of group scope due to evaluation of materiality at the implementation of IFRS 16. The assets are company cars, office- and IT-equipment.

Variable lease expenses

Variable lease expenses comprise expenses related to lease agreements where the payment will fluctuate during the lease term. The fluctuations are primarily due to the use of assets being variable with the invoiced amount reflecting the actual usage, instead of a pre-defined contractual amount. derived from a fixed number of assets leased.

Note 21 - Financial risk

Wallenius Wilhelmsen Ocean AS (the company) has exposure to the following risk from its ordinary operations:

Market risk:

- I) Foreign exchange rate risk
- II) Interest rate risk
- III) Valuation risk on current financial investments

Market risk:

I) Foreign exchange rate risk

The company is exposed to currency risk on revenue and costs in non-functional (non-USD currencies) currencies (transaction risk) and balance sheet items denominated in other currencies other than USD (translation risk). The company's main income, expenses and balance sheet items are nominated in US Dollars, which is the company's functional currency. The company also has exposure to other currencies. Currency clauses are included in some of the major customer contracts. Weight is given to balancing revenue and expenses in each currency, and this currency risk is therefore not hedged.

II) Interest rate risk

The company is exposed to changes in interest rates on its funding (bank overdraft). The interest rate risk is limited for the company on loans to related parties.

Credit risk:

The company has a substantial customer base mainly consisting of global, solid companies, and therefore the company's exposure to credit risk is considered to be limited. Still, the company exercises a strict credit policy and active management of receivables limiting credit risk even further, and the history of loss on receivables is very limited for the company. Further, the company's exposure to credit risk on cash and bank deposits is considered to be very limited as the company maintain banking relationship with well reputed and familiar banks.

To the General Meeting of Wallenius Wilhelmsen Ocean AS

Independent Auditor's Report

Opinion

We have audited the financial statements of Wallenius Wilhelmsen Ocean AS (the Company), which comprise the balance sheet as at 31 December 2022, the income statement, statement of comprehensive income and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements, and
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2022, and its financial performance and its cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors (management) is responsible for the information in the Board of Directors' report. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with simplified application of International Accounting Standards according to the Norwegian Accounting Act section 3-9, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
